OUR PASSION: MEDICAL EVACUATION FOR PNG

MAMA FOUNDATION Mountain Area Medical Airlift

INFORMATION BROCHURE

About Us

MAMA Foundation is a Not-For-Profit Organization whose primary objective is to offer a complete medical evacuation (medevac) solution for Papua New Guinea.

MAJOR SPONSOR:

truCare
Supporting PNG since 1970

OUR STORY

Incorporated on Sept. 01, 2020, MAMA Foundation will focus on the HEMS (helicopter emergency medical service) aspect of Manolos Aviation Ltd, that is, providing medical evacuation service for partner districts, provincial health authorities, the public and private sector, and to support in the provision and extension of health services to rural Papua New Guinea, which is inaccessible by road.

Medical Evacuations which were formerly done under Manolos Aviation Ltd were officially managed by MAMA Foundation since January 2021.

Since 2021, more than 200 patients benefited from this medevac service that was successfully carried out by MAMA Foundation.

THE MEDEVACS WE DO

Emergency Medical Evacuations

Bringing patients to the nearest hospital immediately so that they can get medical help that is crucial to their survival.

Non-Emergency Medical Evacuations

Upon customer request, we are able to medEvac patients to a medical facility of their choice within Papua New Guinea. These medEvacs are usually pre-planned and customized to patient's needs.

Medical Evacuation Referrals

These are usually from the rural health facilities to urban hospitals. In many cases, patients can't make it to any of the nearest rural facilities and call us directly. Our flying nurses thoroughly assess the patient's case and consult with our flight coordinators and pilots before departing for the medEvac. We ensure the best medical equipment and in-flight care for our patients, should a medEvac request arise.

Covid-19 Transfers

Patient transfers for both suspected case and positive case. We are mindful of the risks associated with these transfers and have strict measures in place to ensure the health and safety of the patient, medical personnel and pilot is not compromised.
